EDUCATION

Alabama A&M University, Expected May 2027

Huntsville, AL

Bachelor of Science in Computer Science, General Computer Science Concentration, GPA: 4.0/4.0

TECHNICAL SKILLS

Languages: Python, Go, C++, JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Flask, TensorFlow, LangChain, Pandas, NumPy

Tools & Platforms: Docker, Kubernetes, Redis, PostgreSQL, Firebase, Supabase, Git, Linux, CI/CD, Unity

RELEVANT COURSE WORK

Data Structures and Algorithms, Software Engineering, Database Systems, Theory of Algorithms, Operating Systems, Java Programming, Digital Logic Design

WORK EXPERIENCE

SPLUNK | Software Engineering Intern | Go, Kubernetes, Docker, GitLab CI/CD, Kind, YAML May 2025 – August 2025

- Built Slack notification threading for the Release Train Engine using Go and Kubernetes to better organize StackGroup upgrade messages
- Integrated Slack's chat.postMessage API and stored Slack thread IDs in Kubernetes CRD for threaded notifications
- Developed automatic tagging of TechOps and on-call Release Train Engineers in critical Slack messages, accelerating identification of faulty stacks by 78% during cohorts' upgrade operations

INNOVATION PORTAL | Software Engineering Intern | TypeScript, JavaScript, React, Stockfish Jan 2026 – April 2026

- Built ChessBlindspots, a chess analysis web app that detects blunders from Chess.com games and converts them into personalized drill puzzles, placing 2nd at the 2026 App Build & Pitch Competition
- Engineered a fully client-side Stockfish + Chess.com API pipeline evaluating chess positions in the browser for 30+ users, eliminating server infrastructure entirely at zero hosting cost

ACTIVISION | Game Developer Intern | C#, Unity, Game design, Agile development May 2024 – August 2024

- Developed a noir-themed city builder in Unity/C#, implementing grid-based tile placement, a multi-resource economy manager, and animated building state transitions with smooth visual effects
- Built a retro 90s exploration-combat game engineering Rigidbody physics systems, enemy AI with patrol and aggro states, and level-gated zone progression

PROJECTS AND COMPETITIONS

STAK | Co-Founder & Full-Stack Developer | TypeScript, React, Firebase, Node.js, Gemini API Jan 2026 – Present

- Co-founded and built a full-stack fintech web app with a real-time market data feed and swipeable stock discovery interface, growing to 127 beta users since launch
- Integrated Gemini API to generate structured AI trend insight cards (title, description, sentiment) with server-side response caching and stale-cache fallback on timeout, minimizing LLM API costs and ensuring zero-downtime delivery

GDG OPPORTUNITIES HUB | Supabase, React, TanStack Query, Tailwind CSS Nov 2025

- Collaborated with a team of 8 developers to build and deploy a full-stack web application helping 100+ students discover and track internships, scholarships, and jobs

AAMU COURSE MANAGEMENT APP | GDG @ AAMU | React, Next.js, Tailwind CSS, Radix UI Feb 2026

- Led development of a student course registration planning tool, addressing the university's limited advisor-to-student ratio by empowering students to independently build and visualize semester schedules before advising appointments

SANDIA NATIONAL LABS TRACER FIRE HACKATHON September 2025

- Collaborated on a 5-person team to secure 1st place in a competitive cybersecurity capture the flag (CTF) competition

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Google Developers Student Club Tech Lead, Thurgood Marshall College Fund Scholar, ColorStack Member, NSBE Member, AAMU Honors Program, NSF INSPIRE Researcher, CodePath Tech Exchange Scholar
